

Metal Slitting Machine

Slit gold, silver, & copper foils/strips (0.1mm - 1mm thick) effortlessly with our specialized metal sheet slitting machine. Featuring a customizable take-up system for gentle, tension-controlled winding, it protects delicate precious metals. Achieve clean, accurate cuts for consistent jewelry production strips. Ideal for jewelers(bracelet maker) seeking efficient, waste-minimizing foil handling. Upgrade your production with reliable precision slitting.

Key Features:

- 1. 0.1mm - 1mm Capacity: Handles ultra-thin precious metal foils & sheets.
- 2. Gold, Silver, Copper: Perfect for jewelry materials.
- 3. Custom Take-up System: Gentle winding, minimizes damage & waste.
- 4. Precision Slitting: Clean cuts for consistent strips.
- 5. Jeweler-Focused: Efficient solution for precious metal workshops.

Model	Voltage	Power	Application	Input Thick	Slitting speed	Blade	Slitting width	Weight
CDO-SW02	3 P, 380V	1.5 KW	Gold, silver, copper etc	0.1-1mm	20RPM	HRC60 Hardness	100mm	300kg
